### Abstract of JP 3223206 (A)

**PURPOSE:** To provide a cosmetic containing N-acetylglutamine, exhibiting excellent feeling and skin-beautifying effect and having excellent moisture- retainability and stability in the corneal layer.

**CONSTITUTION:** The objective cosmetic base for increasing the moisture- retainability in the corneal layer contains N-acetylglutamine (or its salt). The cosmetic may be compounded with oil and fat, hydrocarbons, waxes, fatty acid, synthetic esters, alcohols, surfactant, thickening agent, humectant, preservative, perfume, pigment, water, etc. The amount of N-acetylglutamine and/or its salt is preferably 0.005-5.0W/W% in the whole cosmetic. The cosmetic base can be used in the production of face lotion, milky lotion, cream, soap, pack, lipstick, foundation, eye shadow, eye liner, shampoo, rinse, etc.
